

# Transport Time Guidelines

Transport Container	Recommended Maximum Transport Time
	<p>Plastic or cardboard containers - transport time should not exceed 15 minutes.</p>
	<p>Insulated pouches - transport time should not exceed 45 minutes.</p>
	<p>Insulated coolers - transport time should not exceed 4 hours.</p>
	<p>Refrigerated van or truck - acceptable for all transport times and distances. To avoid cross-contamination, food should be in a container and container should not be placed on the floor of the truck. Be sure the refrigeration compartment is at or below 40° Fahrenheit (F), or 4° Celsius (C).</p>

**Monitor temperature during transport to ensure food donations are at or below 40° F (4° C).**

**If food is not frozen at pickup, pack donations with freezer packs.**
